

❖ Objective

- Seeking a position at XYZ Company where I can maximize my Academic learning of computer science, web development and program solving skill.

❖ Technical Knowledge

- **Front-End**
 - React.js, Redux, Next.js, Material-UI
 - CSS, SCSS, Tailwind
- **General Programming Languages**
 - Java, C++
 - Python, JavaScript

❖ Academic Experience

- **Object-Oriented Programming (Java)**
 - Developed several small projects by using concepts of object-oriented (OO), encapsulation, information hiding, inheritance and polymorphism.
 - Designed the plan of project by utilizing modelling tool, such as UML diagrams and CRC cards.
 - Created Object-oriented design by applying application of simple container/collection classes, event-driven programming, exception handling, GUI, multithreading and networking.
- **Algorithm and Data Structure (C++)**
 - Lorem Ipsum
- **Testing/Debugging**
 - Designed a test object class program by using Junit testing to check a project does not have a logical hole.
 - Created a test-driver program by applying the method of ad hoc testing to check if the each of small part of program is working.
 - Built functional entire test program to troubleshoot defects.
- **Teamwork**
 - Collaborated with members on group projects, such as presentations, through meetings both online and in-person, texting, and email.
 - Respected each member with different cultures and ideas, and brought the whole group together while finding a compromise.
 - Creating rules within the group and clarifying the roles of each member, limited the occurrence of problems.

❖ Project

- **Post-it (React.js, Tailwind.css)**
 - Created the user-interface with dark/light mode of the application by using React.js and Tailwind.css.
 - Implemented responsive design for mobile, tablet, and laptop-size display.
 - Designed a back-end side for its application by using Express.js with Node.js.
 - Developed a database by using Mongoose package with MongoDB and implemented.
- **Food Intelligence: Landing Page Demo (HTML/SCSS/JavaScript)**
 - Designed the demo landing website for a virtual start-up company.

- Developed fully responsive website by using media query

➤ **Portfolio (HTML, CSS, JavaScript)**

- Created fully responsive portfolio which has my work

❖ Work Experience

➤ **Server at Gyo-o**

- Collaborated with team members to ensure smooth operation of the hall and kitchen.
- Multitasked in a fast-paced environment to smoothly run the restaurant without problems.
- Provided maximum customer service to ensure they had a comfortable meal time despite a busy schedule.
- Prioritized tasks such as taking orders, cleaning up, serving food, and helping in the kitchen to keep the restaurant running smoothly

➤ **Assistant Manager, Trainer at JoyFit24**

- Trained new staff by example, showing them what they should pay attention to at the gym where I worked on customer service and made sure they had high customer service skills.
- Communicated with all staff member to make sure they weren't uncomfortable with their work environment.
- Reviewed and reduced expenses such as personnel and consumable costs to improve our financial situation by using spreadsheet software to analyze the data.
- Carefully explained the weight training and healthy diet to the customers and had them practice it satisfied the results of body making and the client lost 10 kg of body weight.
- Created a survey box to collect and surveyed customer feedback on our facilities and services to help us improve our services.
- Frequently motivated my team to improve efficiency by sharing sales and customer acquisition results.

➤ **Assistant Manager at 7-Eleven**

- Scheduled the shift for each month to ensure that all work was done without delay by listened to the employees about the days they were available to work.
- Ordered products by referring to past data to minimize the number of products to be wasted as much as possible and achieved to reduce wasting by 7% in a month.
- multi-tasked flawlessly, handling customers, stocking, cashiering, and cleaning.

➤ **Tutor (private)**

- Taught high-school level of Math, Japanese, Biology, Chemistry to acquire a better grade at school exam and entrance-exam for the Japanese University.
- Designed a PowerPoint presentation with a variety of illustrations and examples to make it easier for students to understand.
- In order to achieve the student's goal of passing the test in school, customized a study plan that balanced the amount of practice with the time remaining.

➤ **Stock Clerk at AEON**

- Provided customers with ease of buying by displaying the products neatly and keeping the shelves filled.
- Always observed the sales floor to see if customers were in trouble, and if they were, I would talk to them and solve their problems.

❖ Education

➤ **Langara College, Associate Degree in Computer Science**

2019 - present

Motoki Atarashi
